

Support for Community Planning Partnerships

Our products and services are designed to help Community Planning Partnerships build their capacity to progress public service reform, tackle inequalities, improve their overall effectiveness and deliver enhanced, sustainable outcomes.

Read about them below or visit:

www.improvementservice.org.uk/support-for-community-planning-partnerships.html

Community Planning Outcomes Profile

The Community Planning Outcomes Profile will provide better and more consistent measures for CPP Boards to assess outcomes in their communities and demonstrate the progress they are making in improving outcomes and reducing inequalities. It will also provide a framework to support the sharing of effective practice and strategy between partnerships.

Self-assessment and Improvement Planning in CPPs

Our self-assessment tool, the Partnership Checklist, helps CPPs to critically review their 'fitness for purpose' in achieving shared outcomes and to agree appropriate actions to strengthen the partnership. The approach can be applied to CPP Boards and to thematic groups.

Third Sector Interface Community Planning Improvement Programme

Led by Voluntary Action Scotland, the Improvement Service and Third Sector

Interfaces (TSIs), the programme aims to help TSIs clarify and strengthen their role in community planning, with a focus on delivering the vision of the Statement of Ambition for Community Planning.

National Third Sector Getting It Right for Every Child (GIRFEC) Project

This programme is helping CPPs recognise the role of, and improve links with, the third sector in implementing GIRFEC and planning and developing children's services. It is a partnership between Barnardo's Scotland, Voluntary Action Scotland and the IS, with support from other third sector partners and the Scottish Government.

Support with Place/Locality Working

We've been providing organisational development support for a few CPPs on their approaches to place/locality working. We're now rolling out the learning from this work to support other partnerships in their work.

Economic Outcomes Programme

The Economic Outcomes Programme focuses on encouraging and supporting councils and CPPs to use the full range of economic levers at their disposal. The programme is undertaking an assessment of the current 'economic footprint' of councils in order to identify opportunities to further enhance their economic impact. The result will be focused improvement plans setting out key actions, timescales and responsibilities.

Access2Learning (A2L)

A2L is the IS' free e-learning platform. It offers a wide range of learning resources on different topics that can be used on your organisation's learning management system and some that can be adapted to suit your organisation's needs. Resources are produced by councils, the IS and a wide range of other organisations.

Knowledge Hub

Knowledge Hub is the UK's largest public service collaboration platform. It's the place where people working in public services go to exchange knowledge, experiences and ideas on how to improve services, and connect with peers and experts in a secure environment. It's free to use and offers the opportunity to collaborate in groups around particular themes or projects, connect with colleagues across the public sector and beyond, and follow their activity.

Data and Analysis

Our data and analysis tools can help you understand the different outcomes experienced by communities across Scotland (Community Profiler) and see data on life outcomes mapped to Scotland's neighbourhoods (Viewstat). Our Welfare Reform Dashboard shows key data on welfare reform from NOMIS, DWP and the Scottish Government. We also bespoke research solutions to councils and other public sector bodies seeking to examine a particular issue.
