

**Money Advice Performance Management Summary** 

## **Dundee City Council**

The Money Advice Performance Management Framework (MAPMF) has been developed in consultation with local authorities and other key stakeholders and it aims to measure key performance indicators for money advice services funded by local authorities on both an in-house and commissioned basis.

This is a summary of the key findings from the data returns for 2015-16 for the MAPMF for Dundee City Council.

As this is the second year in which data returns have been provided it is possible to start to identify emerging trends at both local and national levels. The information received from individual local authorities is being collated and used to produce a Scotland-wide analysis which reflects the significant impact of money advice services at a national level. This should be considered in conjunction with this local summary.

Whilst the MAPMF provides a structure from which it is possible to benchmark and target services and to identify and share areas of good practice, it is an iterative process. The current framework does not reflect the full complexity of cases or the many positive outcomes money advice clients experience in addition to financial gain. These areas are the subject of further development.

The key findings in comparison to the reported position in 2014-15 are detailed below:

- Funding for both In-house services and external services has increased slightly
- Staffing numbers remain stable
- The total amount of debt owed by service users appears to have decreased by c20%
- Demand for the service has increased significantly
- The total financial gain for service users is £8,493,207.00
