

PLACE AND WELLBEING ASSESSMENT CHECKLIST

Place and Wellbeing Outcomes

The Place and Wellbeing Outcomes are the evidenced features of what every place needs to enable those who live, work, and relax there to experience wellbeing.

These Outcomes require all of the following to be considered:

Supporting the system	Each outcome becomes embedded in the right policies and plans both nationally and locally.
Equitable outcomes for all	Each outcome takes account of the needs of different populations and geographies and is applied in a way that ensures they achieve equitable outcomes for all. The impact of policy and practice on the experiences of these different populations within Scotland must be considered. Population groups such as those at the end of the table.
Achieving net zero, sustainability and biodiversity	Each outcome takes account of climate impacts in Scotland and globally and the need to achieve net zero greenhouse gas (GHG) emissions. As well as enhance broader environmental sustainability and biodiversity and are applied equitably in a way that contributes to both greater climate resilience and reduced GHG emissions.

How will the proposal impact positively or negatively on these outcomes?

How will the proposal impact those most impacted by inequality?
