

Evaluative Social Return on Investment Analysis of Cosy Kingdom

Cosy Kingdom is a free and impartial energy and debt advice service available to all tenants and homeowners across Fife. The partnership works closely and collaboratively with other local and national organisations. It also provides basic training in energy advice for staff and volunteers in local organisations.

The analysis was undertaken during 2023 and 2024 by the Improvement Service.

The analysis identified those individuals and organisations that derive benefits from Cosy Kingdom and values some of the changes to which participation in, or engagement with, the organisation has contributed.

The benefits that are measured are those that are made possible by an investment of

c.£1m

from a range of funders

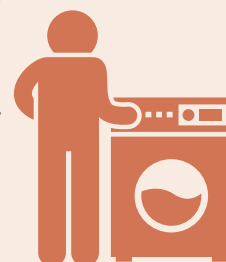

Contributing towards improved health and wellbeing for individuals,

as a result of living in warmer homes and being less stressed about energy costs.

Enabling **individuals to have increased awareness, understanding and confidence to manage how they use energy more effectively.**

Providing **training and support in basic energy provision to improve the skills and understanding of staff in organisations in Fife.**

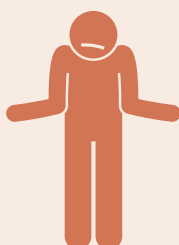

Offering organisations in Fife the opportunity to **make referrals to a trusted organisation to access expert energy advice and support.**

Protecting the environment through reducing carbon emissions resulting from household energy consumption.

There is no alternative organisation providing a similar service and the loss of Cosy Kingdom would leave a gap that would be hard, and expensive, to fill.

It was found that every

£1

invested would generate around

£34

of benefits

By applying a sensitivity analysis, or varying any assumptions made in the calculation, the value of the benefits derived ranges from between

£30 and £36
