

The Money Advice Performance Management Framework (MAPMF) has been developed in consultation with local authorities and other key stakeholders. It aims to measure key performance indicators for money advice services funded by local authorities on both an in-house and commissioned basis.

This is a summary of the key findings from the data returns for 2016/17 for the MAPMF for East Lothian Council.

As this is the third year in which data returns have been provided, it is possible to begin to identify emerging trends at both local and national levels. The information received from individual local authorities has been collated in order to produce a Scotland-wide analysis reflecting the significant impact of money advice services at a national level. This should be considered in conjunction with this local summary.

While the MAPMF provides a structure from which it is possible to benchmark and target services, as well as identify and share areas of good practice, it is an iterative process. The current framework does not reflect the full complexity of cases or the many positive outcomes that money advice clients experience in addition to financial gain. Development is currently underway regarding improvements to the framework that will address these issues in time for reporting on the 2017/18 financial year.

The key findings in comparison to the reported position in 2015/16 are detailed below:1

- Investment in external services has remained steady between 2015/16 and 2016/17 at £138,474
- In 2016/17, 45% of clients accessed the service via telephone, 40% face-to-face, and 15% via email
- 54% of clients accessing the service in 2016/17 were in employment or permanently retired, while 26% were unemployed and seeking work<sup>2</sup>
- In 2016/17, 66% of clients accessing the service had an annual household income of less than £20,000<sup>3</sup>
- The average client financial gain for service users in 2016/17 was £5,0554

<sup>1.</sup> Comparison with 2014/15 figures is not possible, as many were not provided

<sup>2.</sup> Excluding 'Don't Know' category from analysis

<sup>3.</sup> Excluding 'Don't Know' category from analysis

<sup>4.</sup> Calculated by dividing total financial gain by total clients
